Preferred Characteristics of Priority Areas

Ryan Drobek

Center for Energy Efficiency and Renewable Technologies

CENTER FOR ENERGY EFFICIENCY AND RENEWABLE TECHNOLOGIES, SACRAMENTO, CALIFORNIA

"Providing global warming solutions for California and the West"

Ideal Characteristics of Priority Areas

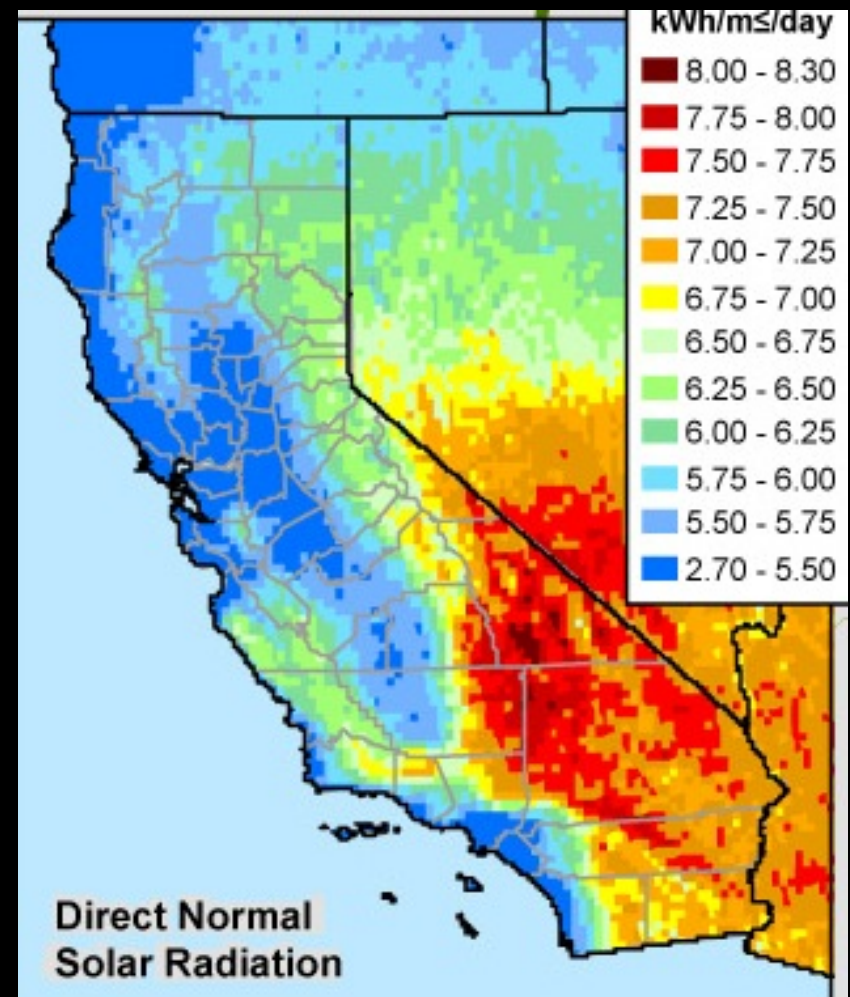

Renewable energy
portfolio = soup.

What makes an ideal
portfolio?

Solar Radiation

Different Solar technologies use different resources.

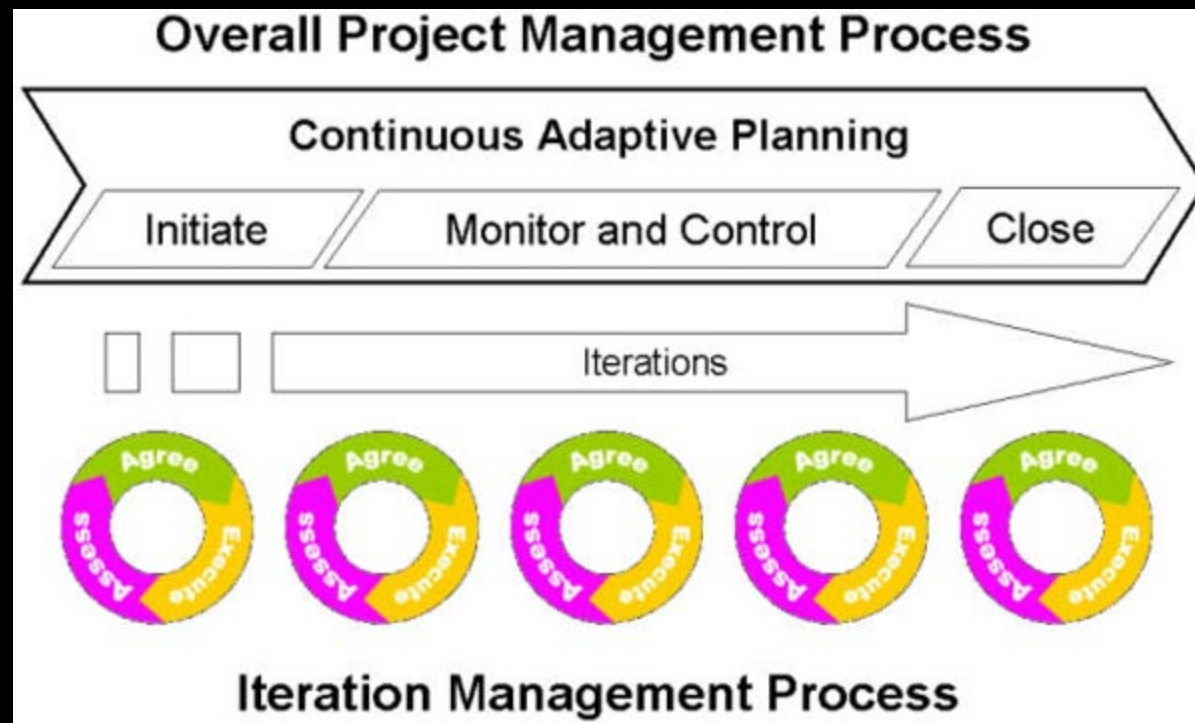

Parcelization

Land use planning can
effect portfolio of
technology.

Flexible and Iterative process
